> Comments of Kerr-McGee Chemical Corporation on the Focused Risk Assessment for the West Chicago Vicinity Properties and the Associated Fact Sheet

Dear Ms. Frey:

RICHARD A. MESERVE

DIRECT DIAL NUMBER

12021 662-5304

On February 25, 1993, Kerr-McGee Chemical Corporation ("Kerr-McGee") submitted comments on the Focused Risk Assessment For West Chicago Vicinity Properties (Jan. 1993). As you know, Kerr-McGee had only a few days within which to prepare and file the comments. As a result, we have discovered that our comments include one minor inaccuracy.

On page 8 of the Kerr-McGee comments we state that "Kerr-McGee has never encountered substantial volumes of undiluted tailings in the residential areas." As it happens, there were two residential sites -- out of the 2726 that were surveyed and, as necessary, remediated -- at which extensive, undiluted tailings were encountered. These sites were clearly unusual and cannot be expected to recur. Although the basic point of our comments is valid -- namely, that EPA was incorrect in its characterization of the extent of tailings contamination at the residential sites -- I am writing to inform you that the assertion on page 8 of our comments was overstated.

Ms. Rebecca Frey March 1, 1993 Page 2

I apologize for this error. If there are any aspects of our comments on which you seek further information, please contact me.

Very truly yours,

Richard A. Meserve
